Essential SAT Skills

Statistics show that test preparation is the key to higher SAT scores. The materials in this program were developed by Cambridge Education Services and are used throughout the country with an extraordinary success rate. At the start of the course, you'll go through a test simulation to identify areas of improvement and focus. Class lessons include reading, writing, and math, as well as the history/social studies and science skills tested throughout the SAT. We'll also practice test-taking strategies and provide skill-building exercises to help you improve. Homework includes reinforcement modules and simulated test problems.
